- A. Educate
- B. Entertain
- C. Persuade
- D. Inform

Question 18: To contrast text on a presentation slide for better viewing, it is preferable to use?

- A. Light text on a light background
- B. Dark text on a dark background
- C. Dark text on light background
- D. Light text on a dark background

Question 19: Avoiding plagiarism is known to be law of?

- A. confidentiality
- B. copyright

- C. courtesy
- D. avoiding copy and paste

Question 20: Proof reading is helpful in?

- A. avoiding misunderstanding
- B. reading the document for understanding
- C. making it available to public
- D. all of above

Question 21: The appendixes is are parts of?

- A. front matter
- B. main text
- C. glossary
- D. back matter

Question 22: Which is not basis for a technical report?

- A. Facts
- B. Tests
- C. Personal opinions
- D. Experiments

Question 23: The order of development of information in the body of the report is done according to the?

- A. choice of the writer
- B. logical sequence of events
- C. collection of data
- D. order in which events occurred

Question 24: Correct the incorrect statement : X is similar in Y?

- A. X is similar as Y
- B. X is similar for Y
- C. X is similar to Y
- D. X is similar with Y

Question 25: Which question is not relevant to an experiment mentioned in a technical report?

- A. What outcome do you expect?
- B. Will successful results confirm an effective sponsorship?
- C. What resources should be measured?

- D. What are appropriate sources of test data?

Question 26: The possible order of points for describing the steps for doing something in sequence is known as?

- A. Topical order
- B. Causal order
- C. Spatial order
- D. Chronological order

Question 27: What is evidence?

- A. Information that ties your claim to your warrant.
- B. Information that disproves your claim.
- C. Information that supports your claim.
- D. Information that supports your warrant.

Question 28: Sincerely, is an example of a...?

- A. Closing Line
- B. Signature Line
- C. Complimentary Closing
- D. Complimentary Line

Question 29: Which of the following sentences uses Parallel structures?

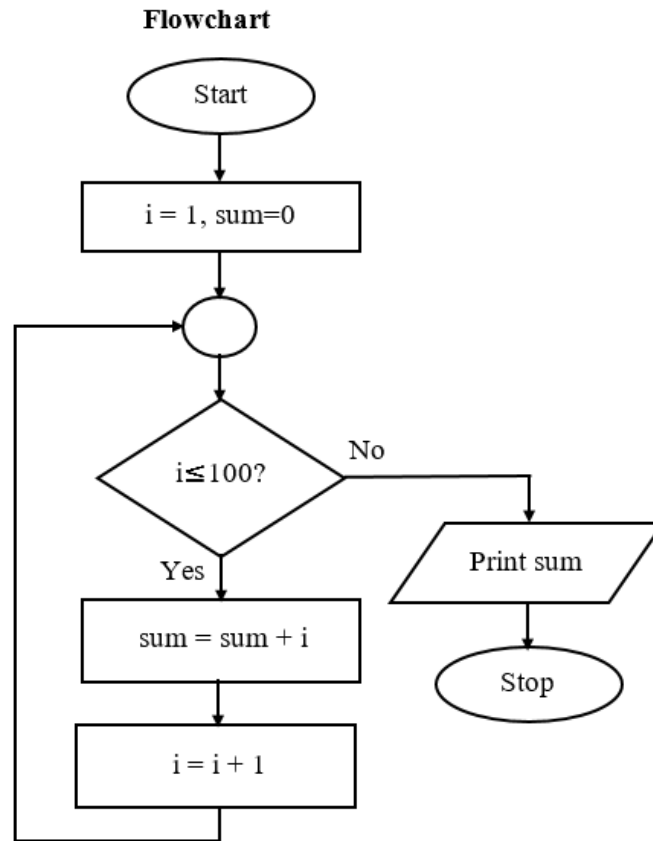

- A. Since D contains all temporal constraints given in the domain, it can be used to determine when P becomes unsafe
- B. X solves the problems of traditional clustering algorithms. Neither outliers nor missing values affect the clustering quality.
- C. The task is not only easy to solve but it can also be solved efficiently
- D. The more complex the model is, the better it describes the training data

Question 30: What is a claim?

- A. A false statement
- B. A true statement
- C. A reasonable statement
- D. An arguable statement

II. Writing

Exercise 1 (2 points): Write a paragraph to describe the algorithm to find sum of number between 1 and 100. The flowchart of this algorithm is shown below.

The algorithm is to find the sum of the numbers from 1 to 100. We can simply use the formula: $(n+1)n/2$. According to the flowchart

First, we set variable i as the current number to add, i is set to 0 and the variable sum stores the sum of the numbers until now.

Next, we start in the while loop, if variable i is less than or equal to 100, sum will be added to the current i , then i will be incremented by 1.

Finally, until the value i is greater than 100, the variable sum has added natural numbers from 1 to 100. Exit the loop, print the sum value and stop the program.

Exercise 2 (2 points): Write a short essay (~ 400 words) on the topic of using Deep learning and AI to forecast ATM cash demand. The essay should include introduction to the problem of ATM cash demand forecasting, the methods and results presented in 3 given papers, and your ideas about this problem.
